DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fletcher 3,959,995.

Fletcher teaches a flexible, compact locking device comprising stackable rod members including a lock core rod 20 having a locking hole 20' at one end and pivot lugs at the opposite end to engage with a pivot lug of adjacent connecting rods 21,22,23, each connecting rod having two pivot lugs at one end and a single pivot lug at the other end to engage with each other with a connecting pin member 26, and a lock rod 24 having a lock member at one end 24" to be inserted into the lock hole 20'.

Allowable Subject Matter

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

While the cited prior art teaches various types of locking devices having multiple connecting rods which are stackable, none of the cited prior art patents

teach or disclose a stacking means for a lock device comprising projections and grooves on the connecting rods as set forth in claim 2.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note, especially, the locking devices of Strocchi 5,913,906, Okada et al 5,732,577, Blake 557,522 (fig. 3), Kuo 5,475,993; also, Chou 4,986,095 and the pivot lugs of Nakai 5,406,811.
